

Volunteering for exam development provides an opportunity to share your clinical expertise, develop new knowledge and skills, enhance your career and contribute to your profession, while earning CPD credits.

Sonography Canada is seeking volunteers as Subject Matter Experts (SMEs) in all specialty areas to create new exam questions for our exam banks. The criteria required to become an Item Writer are as follows:

1. Active Canadian credentialed Sonography Canada member, for a minimum of one (1) year.
2. Able to supply images (a signed Image Acquisition Agreement with any institution or organization providing images will be required).
3. Willing to sign, and abide by, a Non-disclosure (confidentiality) agreement.

Anyone who meets the above criteria and is interested in writing questions, please contact the Sonography Canada Exam Coordinator, Margaret MacDonald, at mmacdonald@sonographycanada.ca.

The next step is to attend a training session in the format of a webinar, about 1 hour in duration, which can be viewed from any computer connected to the internet. The training webinar is available for viewing at any time. Contact the Exam Coordinator to arrange viewing access.

If you have already attended one of the past training sessions and you wish to contribute questions again, please let the Exam Coordinator know.
