

CDC is seeking a dynamic and motivated Pediatric Sonographer to join their growing Ultrasound team in Calgary, Alberta. We will consider a 0.5 pediatric tech with option to round out to full time with general hours or can work part time (either 1 week on, 1 week off, or 2-day/3-day split). CDC is a no on-call, weekends, outpatient clinic.

CDC has a strong presence in Calgary and Edmonton with 16 clinics across both cities. With an excellent team of Radiologists, Management and Technologists at each clinic, you have approachable, hands-on peers and mentors at your fingertips. CDC offers a generous signing bonus and moving expense reimbursement to successful applicants.

CDC focuses on the wellness of individuals with generous vacation allotments and schedules that align with work-life balance. We promote a healthy lifestyle in a province that appeals to the outdoor adventurer.

We look forward to meeting enthusiastic individuals looking for a great opportunity to further their career!

### **Duties & Responsibilities**

- Provide excellent patient care and ensure patient confidentiality.
- Communicate effectively with the patient and staff, recognizing the patient's needs.
- Effectively operate sonographic equipment to obtain and evaluate sonograms to acquire appropriate diagnostic information.
- Integrate diagnostic sonograms, laboratory results, patient history and medical records, adapting sonographic examination as necessary.
- Identify, record and adapt procedures as appropriate to anatomical and pathological diagnostic information and images.
- Prepare preliminary reports and transmit them to the Radiologist.
- Maintain ultrasound equipment, work area and adequate supply levels.
- Participate in the maintenance of accreditation.
- As required, train practicum student sonographers and complete evaluations of students.
- Establish and maintain effective working relationships with patients and staff.
- Follow established departmental procedures.

### **Technical Qualifications**

- ARDMS-registered Pediatric Sonographer, or eligible for pediatric registration.
- Successful graduate of a Canadian accredited Diagnostic Medical Sonography Program.
- Current CRGS with Sonography Canada.
- Experience in advanced skillsets are an asset: breast, MSK, etc.
- Providing a satisfactory criminal and vulnerable sector check as a condition of employment.

### **Other Qualifications**

- Primary focus on patient care.
- Excellent interpersonal communication skills, seeking collaboration with all clinic team members.
- Able to work independently and as a team in a fast-paced environment.
- Superior organization, initiative and time management to keep up with a demanding work load.
- Strong prioritization, critical thinking skills, and sound judgement when reviewing cases.
- Easily adaptable to new equipment and environments.
