WELCOME

We are thrilled that you have joined us in beautiful Toronto for 'Sono in the City', Sonography Canada's 37th Conference and Annual General Meeting. Over the course of the next 3 days, we promise to indulge your minds, your connections and hopefully your sense of fun! The planning committee has been working very hard to plan and deliver a wide-range of educational sessions that will not only build your skill set, but will also showcase some of the best talent in our community.

Following our welcome reception on Thursday evening, we will kick-off the conference with two great keynote sessions before diving into workshops and sessions. Friday will end with a 'can't miss' keynote with Joan Baker, sonography pioneer, and then relax and connect with colleagues at the Exhibitor Reception! More great education on Saturday with our Annual General Meeting scheduled at the end of the day where you get to hear more from the association's leadership on many exciting developments for Sonography Canada. Then, the fun really begins with our Toronto Harbour Cruise on Saturday night. Look out for pirates while you enjoy great food, cocktails and networking with friends while taking in Toronto's gorgeous skyline.

Sunday begins with another fantastic keynote featuring an overview of emerging technologies we all need to be aware of, more in-depth sessions and wraps with an important session on the NEW National Competency Profiles and Professional Practice Guidelines. Look out for the 'Case of the Day' monitors and make sure you visit with all our exhibitors and business partners participating in the show. Not only can you make even more important connections – you could also win some great prizes!

If you need assistance at any time please seek out any of the planning committee members, or the staff at the registration desk. We all want you to have a great experience as you Innovate, Integrate and Invigorate!
