

Bridging Course for Internationally-educated  
Healthcare Professionals

# Fast-track your sonography skills

## Ultrasound Scanning Evaluation

The **Ultrasound Scanning Evaluation** course (BPUS800) is a focused, four-weekend program designed to strengthen your practical sonography skills and prepare you for the **Canadian Clinical Skills Assessment (CCSA)** exam. Through intensive, hands-on training in Michener's state-of-the-art ultrasound labs, you'll practice standardized protocols across abdominal, pelvic, thyroid, and vascular imaging.

### Program benefits for you

- Gain structured, supervised lab experience to refine scanning techniques.
- Build the confidence and precision needed for CCSA and clinical practice.
- Learn from expert instructors in a supportive, simulation-rich environment.
- Balance professional development with your schedule through weekend sessions.

Whether you're preparing for certification or looking to refresh your skills, this program helps you bridge knowledge with practice and take the next step in your ultrasound career.
